ABOUT ME

I am a software development technician trained at Campuslands GT and based in Guatemala City. I have knowledge of interface development and reusable components, database design and modeling, and computer technical support.
My professional goal is to become a Full Stack developer, providing efficient, structured and functional solutions to the teams I work with. I am characterized by my willingness to learn, my commitment to quality and my interest in continuing to develop my technical and professional skills in software development.

WORK EXPERIENCE

CampuslandsGT — **2026 – In progress**

Full Stack – Alba Project

Mobile development of Alba, a geriatric health platform involving older adults, caregivers and medical staff. Modular architecture in Flutter/Dart and Firebase, working in an agile team of 10 developers using Git. Applied clean architecture and WCAG AAA standards to deliver an accessible, scalable solution.

Villa de los Niños — **October 2025**

Technical Support Assistant

- Technical support for the equipment of three computer labs.
- Preventive maintenance, cleaning and basic hardware diagnostics.
- Formatting and preparation of computers by reinstalling the operating system and required software.
